Dean's Message To the Class of 2003

Dean's Message
2003 Terra Mariae

Pharmacy is a profession that is always evolving and growing. Ten years ago, the School instituted sweeping changes to its curriculum, transforming its traditional Bachelor of Science degree into a new, four-year professional PharmD degree.

Today, pharmacists are recognized as a vital element of the health care team. Demand for your services will increase as the population ages and drugs become more potent and complex. We cannot predict how the profession will change over the course of your career, but what we can predict is that there will be more changes in the future.

You are the beneficiaries of the work of past alums. It is up to you to take what you've inherited here and build upon it. Decades from now, the School will be judged by your success and your accomplishments. When you review this book ten or twenty years, you will be able to reflect both on your work here at Maryland and upon what you did to influence the evolution of pharmacy practice.

Congratulations and good luck!

Dean David A. Knapp, Ph.D

Dedications

Dr. Ginette Serrero

Professor Serrero joined the School of Pharmacy in the summer of 1995 as a research associate ɔfessor. In 1997 she became associate professor with tenure and in 2000 she was promoted to full ɔfessor. In November 2002, she resigned from her position to become the Vice President and Director Research and Development of A & G Pharmaceutical Inc., a biotechnology company she co-founded June 2000. She is still associated with UMD as an adjunct professor actively engaged in graduate ;earch activities. During her short tenure at the SOP, she dedicated her energy to the betterment of MD through service on numerous committees, teaching in both the professional and graduate ɔgrams, mentoring graduate students and postdoctoral fellows, and carrying out fascinating research ıded by federal and private grants. She is internationally known for her work on cancer biology and ipocyte differentiation.

These efforts included discovery of a novel growth factor, which plays a critical role in cancer velopment, namely breast cancer. She is one of the few scientists to transition basic scientific ;coveries into diagnostic tools and novel therapies. For her it will be a dream come true to cure cancer bringing her discoveries into the clinic.

Many of you had the opportunity to appreciate Prof. Serrero's enthusiasm for education and research the Biochemistry, Clinical Chemistry and ISAT lectures she delivered over the past 7 years. You may :all her on the podium demanding full attention while teaching with passion and lecturing with a ɜnch accent, often using her hands as much as her voice. It is that enthusiasm combined with high ɔectations, morality, a sense of justice and courage that made her contributions so large. Although we ıy not see her on campus often, I'm sure we will continue to hear about her. We hope for her success the future.

-Jun Hayashi and Alex MacKerell

"Education is for improving the lives of others and for leaving your community and world better than you found it."
-Marian Wright Edelman

Dr. Karen Plaisance

Dr. Karen Plaisance received her Doctor of Pharmacy degree from the State University of New York at Buffalo, and completed a Post Doctoral Fellowship at Hartford Hospital in Hartford, Connecticut. Her career began in 1984 at the University of Maryland School of Pharmacy where she established the first Infectious Disease clinical training site at the school. Since that time, her influence on education has indelibly impacted both the professional and graduate curriculum. An early proponent of integrating basi science and clinical education, Dr. Plaisance worked closely with faculty in the science departments to develop a model of collaborative education that led to the development of the Antibiotics, Biologicals, and Infectious Disease course, and ultimately to the Immunology and Microbiology/Antibiotics courses. This collaborative cross-disciplinary approach became the model for both her educational and research activities. Students in the professional program appreciated and quickly realized the benefit of establishing the precepts of scientific foundation as a basis for therapeutic decision-making in the clinical setting.

Dr. Plaisance's attention to innovative educational methodology was also evident in her efforts to develop and evaluate methods for students to master and demonstrate critical skills in pharmaceutical care in areas other than infectious diseases. Her contributions to the development of educational tools such as the Integrated Patient Management model earned the respect of both colleagues and students. A two-time recipient of the School of Pharmacy Teacher of the Year Award, Dr.Plaisance's skills as an educator benefited students and faculty through her efforts as chair of the Curriculum Committee, Graduate Studies and Research Committee, and Vice-chair for Education for the Department of Pharmacy Practice and Science.

The model of interdisciplinary activity critical to Dr. Plaisance's educational success applied to her research activities as well. Her collaborative research with the Division of Infectious Diseases, Pharmaceutical Science faculty and Pharmacy Practice colleagues gained her national recognition. After nearly 20 years, Dr. Karen Plaisance, a truly skilled educator, has clearly improved the professional lives of the students she has taught and the patients that they serve, and has left the School of Pharmacy better world than she found it.

-David S. Roffman, Pharm.D.

Dr. Barbara Zirkin

With great pleasure I write this yearbook dedication in honor of my friend Barbara. In the two and a half years we have worked together at the School of Pharmacy, we have been colleagues and confidants as life events have arisen.

Dr. Zirkin has accepted the position of Dean of Academic Administration, Chief Academic Officer, and Associate Professor at Baltimore Hebrew University. She has said that all her career paths intersect for this capstone professional opportunity. She has taught at the high school level, and as a working mother, she pursued advanced degrees, including a PhD in education. While she has been at the School of Pharmacy, we have educated her about pharmacy, and she has helped us with educational expertise for curricular assessment, course creation, and the use of technology to augment teaching.

On the personal side, she has been my sounding board for ideas, my co-author on grants and posters, and even my roommate at national meetings. She is inquisitive, tenacious, and fun. She teases me about my excessive clothing packing as I have tried to learn from her minimalist, color-coordinated approach to travel. We have shared the joy of planning for my daughter's wedding, and later her son's, and we enjoy the political advocacy challenges in Maryland government.

While I wish Barbara happiness and fulfillment in her new position, I will miss our weekly walk to Lexington Market for a Greek salad. At least I know her words of encouragement will be a phone call away. Please join me in congratulating Dean Zirkin.

-Cynthia Boyle

Congratulations Dr. Hollenbeck

The 2002-2003 recepient of University of Maryland Excellence in Teaching Award

As you know, our own Professor R. Gary Hollenbeck, Ph.D. received the 2002-2003 University of aryland Excellence in Teaching Award. This award is the highest campus award for teaching. Dr. llenbeck is an internationally known pharmacy educator. His reputation stems from his excellence as a ssroom and laboratory instructor, his scholarship in teaching, and his professional service to the academic armacy and pharmaceutical sciences communities.

Dr. Hollenbeck's love of classroom and laboratory teaching is evident every day. He teaches classes at all els of pharmacy education, including in the entry level PharmD program, the non-traditional PharmD thway, and the pharmaceutical sciences graduate program. In addition to being a prolific teacher, he provides ceptional presentations. His lectures are crystal clear and enjoyable. He emphasizes major points on multiple casions. He exemplifies concepts with practice-based cases. He supplements lectures with in class exercises, mework, audiovisuals and laboratories. Dr. Hollenbeck uses many strategies to engage students, maximize ir interest, and evaluate their learning.

Through the scholarship of teaching, Dr. Hollenbeck has served the School, the campus, and the pharmacy fession in many capacities. Dr. Hollenbeck has done it all, regarding pharmacy teaching and pharmacy ucation. Within the School of Pharmacy, he is the go-to resource - faculty retreats, teaching evaluations, peer ntoring, curricular revision, school policy, and instructional resources. Dr. Hollenbeck was one of the hitects of the School's nationally recognized Doctor of Pharmacy program. He is very capable as Associate an for Academic Programs. Similarly, Dr. Hollenbeck's national and international reputations are just as minent. Dr. Hollenbeck is very active in educational circles, including the AACP Institute, which is the mier education event for pharmacy educators.

However, counting teaching assignments and committee participation underestimates Dr. Hollenbeck's tributions. He is a unique faculty member - a strategic, creative thinker with the ability to clearly articulate d implement change. For example, Dr. Hollenbeck served on the AACP Focus Group for Liberalization of Curriculum, which generated ability-based and professional outcomes for pharmacy education. This cument is one of the most cited references in pharmacy education in the last 10 years.

Dr. Hollenbeck's teaching effectiveness has also impacted others outside the campus and outside of academic armacy. For example, the FDA wished to conduct an intra-agency educational program, as well as a armaceutical industry-wide educational program, for FDA's implementation of a new regulatory guideline. cause of the anticipated impact of this new FDA guidance, as well as the technological and regulatory nplexities of the guidance, a high quality, effective educational campaign was necessary. Dr. Hollenbeck was ected by the FDA to design and lead this effort. For his impact, Dr. Hollenbeck received a Special cognition Award from the FDA, the highest award bestowed by FDA.

All of us are proud to have Dr. Hollenbeck as a colleague and teacher. Congratulations, Dr. Hollenbeck ! e have learned much from you.

-James E. Polli, Ph.D.
Associate Professor

Dear Class of 2003:

It's been truly an honor to be the advisor for the Class of 2003. I'm very proud of the class - individually and collectively you've done some amazing things during your tenure here at the University of Maryland School of Pharmacy. I'm confident that each of you will make a unique and valuable contribution to our world through your work as a pharmacist or through whatever path you create in the future.

Dr. Knapp asked me to write a pharmaceutical care plan for the Class of 2003 when they entered the school in the Fall of 1999. I know that every University of Maryland student has fond memories of writing pharmaceutical care plans. But just in case 50 years from now you've forgotten what a pharmaceutical care plan is it's a tool used to gather information about patients, to make well reasoned decision about drug therapy, to monitor progress toward therapeutic goals, and to ensure that adverse effects are detected early.

Pharmaceutical Care Plan
by: Stuart Haines

Here's my pharmaceutical care plan for the Class of 2003:

DATE: August 30, 1999 (First day of school)

DEMOGRAPHIC INFO: A to Z is a 25.3 year old (mean age) mostly female (67% female/33% male) from a diverse racial, ethnic, and cultural background. She is 78% from Maryland but a part of her fee that California, Florida, New York, Pennsylvania, and Virginia are her home.

CHIEF COMPLAINT: "I want to become a pharmacist."

HISTORY OF PRESENT ILLNESS: A to Z's problem began (on average) 3 ¿ years ago when she decided that she might like to become a health care professional. She examined all the possibilities an decided that pharmacy was a good fit for her personality, academic strengths, and personal interests. I particular, she was attracted by "the opportunities to enter a challenging field at a time of transition in health care" - at least that's what she said during her interview.

PAST MEDICAL HISTORY: A to Z earned a BS degree or higher (60% of the time) and worked in the field of pharmacy (58% of the time) prior to enrolling in the school of pharmacy.

MEDICATION HISTORY: Currently, A to Z takes no prescription, OTC, or herbal medications. H vaccinations are up-to-date including hepatitis B. She denies drug allergies or prior adverse reactions.

FAMILY MEDICAL HISTORY: Her family history is not contributory - although she admits that sh was influenced by her parents and siblings - who are also health care professionals.

SOCIAL HISTORY: A to Z lives with a room mate in an apartment near the University of Marylan campus. She admits to the social use of alcohol. She states her diet is OK but she eats a lot of pizza a drinks tons of diet coke. She enjoys singing karoke.

REVIEW OF SYSTEMS: All systems were within normal limits. There were no pertinent positives negatives.

OBJECTIVE DATA: A to Z is a well-groomed but slightly apprehensive looking 67% female who appears to be stated age. She is oriented to person, place, and time. Her height and weight are avera She scored at the 90th percentile on the PCAT exam. There are no other pertinent physical findings o abnormal laboratory tests.

BLEM LIST: Problem #1 - Pharmacy Aspirations

BLEM ASSESSMENT: The etiology of this problem is unclear but genetic factors may be ved. The problem appears to stable at this time primarily due to the level of commitment ssed. While there is little chance of mortality or significant morbidity, this problem is quite e.

RAPEUTIC OBJECTIVES:
omplete the required coursework to earn the Doctor of Pharmacy degree from the University of land
ass the National Boards of Pharmacy Licensure Examination and become a licensed pharmacist cure a great position in the field of pharmacy

SSMENT OF CURRENT THERAPY: A to Z is currently enrolled in the Doctor of Pharmacy e program at the University of Maryland. And while there are alternative therapies for this em, the University of Maryland is clearly the best option.

RAPEUTIC RECOMMENDATIONS: Consume caffeine, ginseng, and ginkgo biloba daily. vill enhance academic performance and improve wakefulness during the many, many hours of It comes in variety of dosage forms - capsules, tablets, and beverages. Non-drug mendations include get plenty of rest and study with a group of friends. I recommended a al to the Office of Student Affairs for tutoring.

ITORING PLAN: Efficacy monitoring parameters include - subjectively - feelings of pride, of progress, and satisfaction with the educational experience - and objectively - scores on exams sessments, preceptor evaluations, and grades. Ultimately, a diploma and a license to practice acy. Toxicity parameters include - subjectively - sleep disturbances, weight loss, anxiety, and Objectively - number of miles driven and number of gallons of gasoline consumed. Of course, ajor toxicity is accumulated debt.

ENT EDUCATION PLAN: The patient education plan is far too long to include all of the . But I have a copy of the school catalogue if you'd like to review it.

all know, the care plan for the Class of 2003 was fully implemented and the faculty monitored rogress toward the therapeutic objective. I'm pleased to say that each of you has achieved those ves while suffering only moderate toxicity. You completed the requirements for the Doctor of acy degree, passed the board examinations, and secured a rewarding position in pharmacy completed a residency or fellowship.

ishes! I will keep your care plan file open. Please keep in touch so that I can write my follow-up notes.

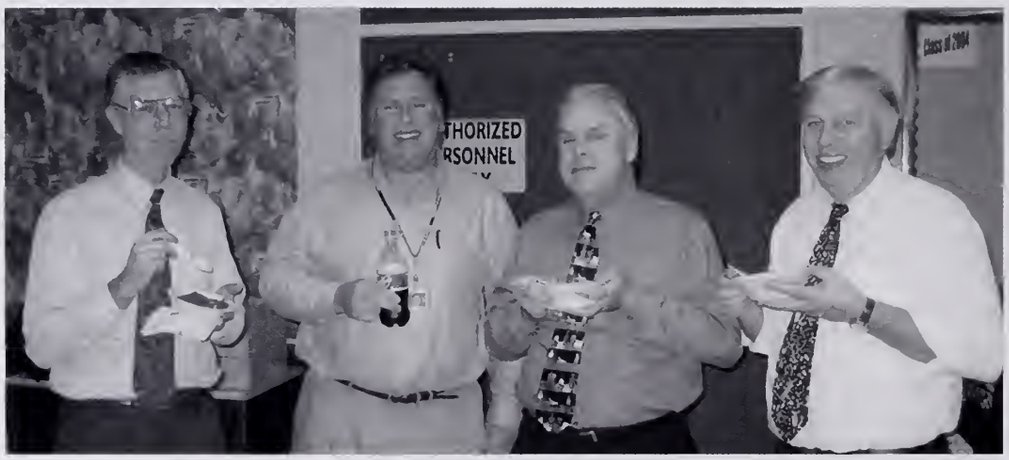
The Class of 2004 Sponsored Faculty Chili Cookoff!

Faculty goes head-to-head with the Chili Cookoff! Batches of chili were cooked an taste-tested by student judges. The entire school was welcomed to a share as well!

Top: A crowd gathers around th chili tables to taste the different renditions of chili.
Middle Left: Dr. Beardsley, Dr. DiGate, Mr. Rumrill, and Dr. M enjoy their samplings of chili.
Middle Right: Drs. Hayashi and Serrero pose for a snapshot befo getting their share of chili.
Bottom: The tasters get samples each batch of chili and gives it th opinion of which is the best.



A large crowd filled Pharmacy Hall for the Chili Cookoff! The line spread to the door as everyone wanted a taste of their professors' cooking!

Left: People waited impatiently as their stomach grumbled for the hot chili. Several Second Years are attempting to study despite the noise and the aroma of the food. If they hurry and finish the assignment, there might be some food left.

e: Students find seats to settle down and ter waiting in line for the chili. Looking smiles on these faces, the chili must have great!

Above: Shelly McDermaid, Heather Robinson, and Katie Brace manages to find seats and began to enjoy the chili.

Left: Hyun Lee, Teresa Vu, Lucy Nguyen, Kelly Park, Patrick Park, and Charlene Ramjohn ta.ke time for a break e after having served the massive number of students, faculty and staff that turned out for the event.

Class of 2004

Third Year students took any opportunity that came their way to have fun. Members from all classes came to the 2002 Fall Picnic at Patapsco Park to enjoy the hot grilled food and cold drinks. Some took walks, others played friendly game of football, baseball, and even frisbee. It was a time for catching up on each others' lives, hanging out and forgetting about school work and exams. This was a welcomed break as they worked their way through ISAT.

Top: The guys team up a game of football. Co this be the result of all t group projects they hav had to endure together?

Left: Enjoying a meal o hamburgers, hot dogs, sausages, and grilled chicken are Kelly Park, Patrick Park, Yoo-Jin L Bahru Habtemariam, Joowon Chung, Manisa Tanprayoon, Cherry del Rosario.

Soaking up some sun or taking in the cool shade, everyone had fun. Sharing the good time with friends!

CANDID

CANDID SHOTS!

The Good, The Bad, The Class of 2005

The many faces of the class of 2005 sure do know how smile for the camera.

From birthdays to boat cruises to shopping, the class of 2005 knows how to show everyone how to have a good time.

Finally, after 10 exhausting hours on the bus i
time for fun in the sun at Myrtle Beach...

HUMMM I WONDER IF ITS STILL SNOWING BACK IN BALTIMORE?

YOU'RE ON THE LINE

time to work on that tan

The 7 wonders of Myrtle Beach

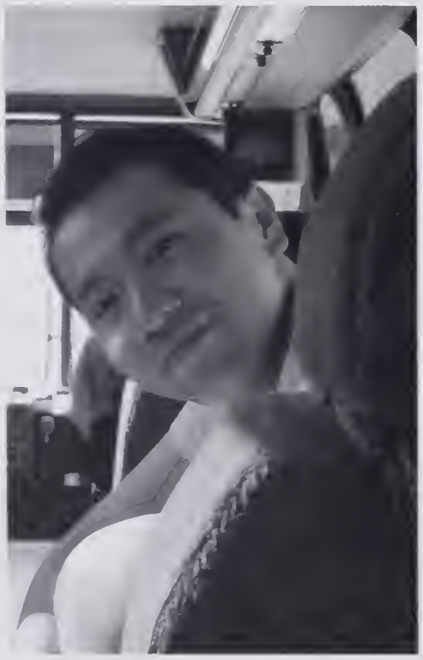
Hey guys, my lillip points this way to the

1. The temple of students at Ephesus.
2. The colossus of Alex.
3. The dinosaur at Halicarnassus.
4. The great pyramid of Hard Rock Cafe.
5. The hanging gardens of Darren.
6. The Ben & Jerrys at Alexandria.
7. The statue of the Big Chair at Olympia.

he class of 2005
'Puttin' on their
p hats, Tyin' up
eir white ties, and
Brushin' off their
tails for a
emorable dinner at
Thoroughbreds

Top 5 most memorable moments of the class of 2005 trip to Myrtle Beach:

5. Wendy's again?
4. Is it really Frank's birthday?
3. Kristen creates mafia and is killed by her own game.
2. Humm, Is Doug ever going to show up?
1. You're on the line!



CLASS OF 2006

"We make Pharmacy School look good...

and Maryland brand pharmacy even better..."

-Tom Williams

Sharon Zappa and Paul Gleespen

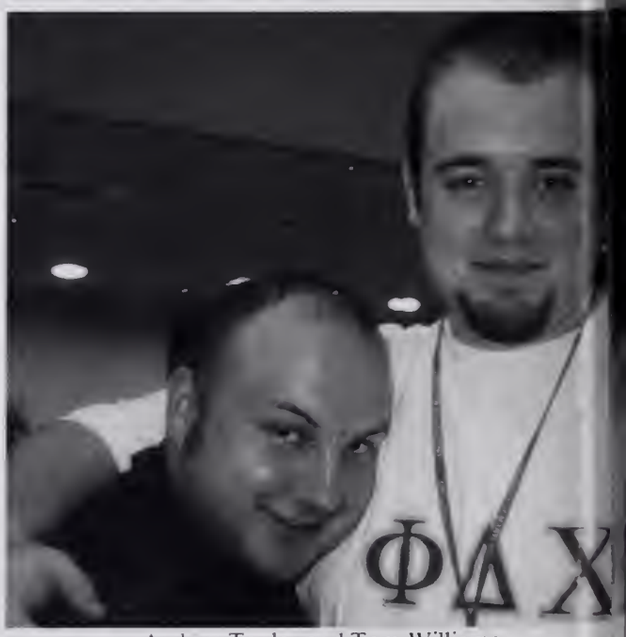
The Class of 2006 hangs out together all over the place. We've got boat cruise hang out pictures, pickles pub, and camden pub, and even in pharmacy hall.

Asma Syed and Shabnam Syed

Andrew Taylor and Helena Kim

Alan Chung and Jennifer Huang

Leah Hart and Melissa Werner



Andrew Taylor and Tom Williams

The Boat Cruise

e of us couldn't get enough of
rst boat cruise and decided we
ed more.

Tam Dang and Jung Kim

The Class of 2006

Class '06 Pictures

The Class of 2006 isn't always the most punctual class.

Most of us managed to get to Pharmacy Hall in time for the picture, but a few of us lagged behind.

The Rest of the Class of 2006

Yi, Tam Dang, Katherine Kim
e the boat cruise.

Jen Mercado, Maggie DiMatteo, Tracy Keller, and Amy Mudd at the spring picnic.

Clarence Chung just doesn't like to have his picture taken so we had to put this picture in.

Osborne, Tracy Keller, Deb Pucher

Alan Chung working on webpages...or is he

Williams giving the look

When the school needed people to take over the creation and management of webpages they didn't expect to have Tom Williams and Alan Chung to fill those positions for multiple organizations... maybe half of them

First Year Class Officers

President:	Hongly La
Vice President:	Alan Chung
Treasurer:	Duke Piyathaisere
Secretary:	Tam Dang
Historian:	Leah Hart
USGA Rep:	Helena Kim Amy Mudd

First year's happy hour at Pickles Pub!

Who are the partiers? and who are the bookworms? So hard to tell when they are having so much fun!!!!

Doesn't Jen Huang the most beautiful smile??
Smile for the cama

Look at all the fresh faces!

Having fun yet?

Smile! First year's have the time of their life at Pickles. Little do they know about what is to come....

1st years are getting to know each other...how sweet!!!

PARTY!

Student Government Association

For the past one year, I have had the luxurious opportunity to serve as the Student Government Association (SGA) President. It is certainly an experience I will always cherish for the rest of my life. The year started on a very strong foot with the selection of Dr. Cynthia Boyle as the Student Government Association (SGA) advisor. In addition, the summer leadership retreat at the Donaldson Brown Center gave us the legs and tools to work with throughout the year. At the leadership retreat, we learned about the different personalities within the SGA namely koala, peacock, lion, and owl. As someone in a leadership position, I have learned to acknowledge and maximize the different personalities within the SGA.

However, this SGA as a whole has been one that has helped to institute many changes within the School of Pharmacy. The change started with the Blackboard survey that was created by Katie Brace and Bart Rogers. This survey proved to be very useful and some of the suggestions made have already been instituted. We also tackled other issues like financial aid, tuition surcharges, and tuition increases. For the first time in the school's history, the majority of the organizations including the SGA have a webs Thanks to Patrick Park for the dedication of his time and effort in making sure the websites were created. We also conducted the SGA elections on scantron cards for the first time. Thanks to Craig Long and other that helped made the electoral process successful. While we worked very hard throughout the year, we als had fun. The fun started with the usual rush events of the organizations and fraternities, along with the unforgettable boat cruise. We also had a wonderful picnic that was coordinated by the concerted efforts of David Tsung, Frank Shen, Dr. Buterbaugh, and Helena Kim and crew.

Personally, I wouldn't have been able to carry out my duties successfully without the help of my fello SGA officers: Craig Long, Kristine Rapan, and Kenna Tata. Thank you very much for your help, advice, dedication. I would like to thank Dr. Beardsley, Mrs. Margaret Hayes, Dean Knapp, Dr. Hollenbeck and lovely ladies of the second floor and 7th floor for their support and advice as well. I would also like to th my girlfriend Kaitlyn Mey Ly for being there when things were getting rough. Finally, I would like to th Dr. Boyle for her advice, ideas and effort to make this SGA better.

There are several challenges ahead for the SGA including updating their websites, increasing student involvement in organizations, and creating an atmosphere that is fun and conducive to learning. To all my fellow students, keep up the good work and go with the flow. The end is almost near.

thank you very much and God Bless,

-Adams Solola

SGA leaders are here to serve you!!

Did we do a good job or what?!

03 Officers get ready to take charge, as the current offciers (right) get leave their officership with a smile.

What can we do for YOU?

s right
and
we get
for doing
e hard

ZZA!

Dr. Boyle thanks us after receiving a gift from SGA

tworking and job
searching.

Left: Yang Xu, Queenie Liu, Kaitlyn Liu, Hyun Lee, Tihitina Taffesse, David Tsung.

Tsung, Mani Unterman, Pete Do, Megan Potter, Rebecca
in, Heather Robinson, Brian Grover, and Mike Kehr.

There were many activities to keep ASHP members bisy at ASHP''s 37th meeting. Wide variety of topics were covered such as patient safety and future emergency preparing. The Exhibit Hall gave the members an opportunity to see new technologies and pharmaceutical products.

ABAE

A Bridge to Academic Excellence

A service to the needs of middle and high school students from the Baltimore City and Baltimore County schools, ABAE offers tutoring, mentoring, and internship opportunities. Created in April 2000 by Renee Riddix-Hilliard, then a 4th year PharmD student, with Margaret Hayes as the advisor, ABAE is one of the few organizations that allows for interaction between the different professional schools as well as reaching out to the local community. ABAE's accomplishments are evident in the improvements in student grades, confidence, and their feedback.

Helping to build a brighter future for the next generatio

Giving back to our community

Top right: ABAE tutors stand proud as they share a well-earned holid celebration with the tutees. Their dedication to tutoring has helped ma students achieve higher goals.
Top right: Students from the local high school celebrate the end of the semester with their tutors in PLC. The hours spent with their tutors has paid off as they go towards the end of the semester with confidence.
Above: 2nd Year PharmD student Trisha Lindo volunteers her time as an ABAE tutor, taking one two students at this tutoring session.
Left: Students busily practicing at a tutoring session

Putting time and effort into studying and getting help wherever the student finds difficulty. ABAE provides a professional learning environment with encoraging and knowlegeable tutors. The tutors are well prepared and enthusiatic in helping out.

Top Left: 1st Year PharmD student, Duke Piyathaisere gives a lesson in alebra and trigonometry as he demonstrates on the board.

Left: Tutors and tustees gather for a group picture after the party to reqard everyone for a job well done!

Lower Left: Students practice the math problems assigned during a study session, working in small groups.

ABAE Awards Recognition Ceremony

The annual awards ceremony was held to thank tutors, advisor, and guest speakers, as well as encouragement for the students to excel. Every high school student received a certificate, and students whose academic performance improves one letter grade received an additional reward, donated by a sponsor.

Top Right: Awards Ceremony held in the MSTF Auditorium of the Medical School.

National Community Pharmacists Association

Mission:

1. We are dedicated to the continuing growth and prosperity of independent community pharmacy in the United States.

2. We are the national pharmacy association representing the professional and proprietary interests of independent community pharmacists and will vigorously promote and defend those interests.

3. We are committed to high-quality pharmacist care and to restoing, maintaining, and promoting the health and well-being of the public we serve.

4. We believe in the inherent virtues of the American free enterprise system and will do all we can to ensure the ability of independent community pharmacists to compete in a free and fair marketplace.

5. We value the right to petition the appropriate legislative and regulatory bodies to serve the needs of those we represent.

6. We will utilize our resources to achieve these ends in an ethical and socially responsible manner.

Members here are seen networking and enjoying themselves at the NCPA PubNite. Others are rubbing elbows with members around the country at the national convention.

Kappa Psi - Sigma Chapter

Kappa Psi Professional Pharmaceutical Fraternity was founded on May 30, 1879 in New Haven, Connecticut by Harvey Smith. This makes Kappa Psi the oldest pharmaceutical fraternity. Since then the fraternity has grown and flourished to become the largest and most known of the pharmaceutical fraternities. With their strength and numbers Kappa Psi brothers hold many higher level positions in numerous companies and organizations alike. Its members span from ocean to ocean and are always available with an open hand to help a fellow brother.

a Psi brothers consist of leaders who o shape the school of pharmacy. They upport each other, and there is ndous brotherly love among them.

A little History

Phi Delta Chi (PDC) was founded on November 2, 1883 by eleven men at the University of Michigan, Ann Arbor. PDC is the first professional fraternity of pharmacy founded by pharmacists. The Iota chapter was founded in 1905 at the University of Maryland, Baltimore. "The object of this association shall be to advance the science of pharmacy and it's allied interests and to foster and promote a spirit of brotherhood among its member." Phi Dex brothers have traditionally held many prominent positions within the country. Within the pharmaceutical manufacturing field such names as Lilly, Weeks and Meyer are familiar. Many are prominent in politics. In fact, one brother, Hubert H. Humphrey, served as Vice President of the United States. Many others are well-known in their communities as well. Phi Delts from across the nation meet regularly to discuss fraternity issues, meet fellow brothers, and to decide the future of the fraternity. National Grand Councils are held biannually, this year it is held in Minneapolis, Saint Paul. In addition, regional meetings and leadership seminars are also periodically organized.

Top: PDC leadership development seminar @ Denver Colorado. Erie Meisel, Rebecca Goldstein, Brian Groved, Heather Robinson, Kristine Rapan. **Middle:** Boo gram setup team. **Bottom:** Ravens Concession stand fundraiser event. Shelby Payne, Jason Bunting, Lisa Moorehead.

Associate Dean of Academic Affairs

Gary Hollenbeck, Ph.D.

The person who most influenced my life was my father. He worked hard and accomplished things; he provided for his family; he liked people, and people liked him. While he had many careers (e.g., electronic technician, repairman, carpenter, office manager, justice of the peace) he was always solving problems in creative ways.

If I could meet anyone from the past, it would be J. Willard Gibbs. Maybe he could explain entropy to me.

If I could live anywhere in the world, it would be anywhere on a beach.

If I had to change one thing about myself, it would be eliminating my tendency toward over-committment.

If I could be remembered for one saying, it would be "Patience is a virtue."

If I could give one piece of advice to students, I would say "Be patient - and don't be a minimalist. Get as much out of your foundational, educational experience as possible. Enjoy and learn and don't feel compelled to move through life too quickly.".

The 2001-2002 academic year brought variety of temporary and permanent hanges to administration. Dr. David napp pursued scholarly and personal ndeavors during his sabbatical this fall emester. During this time, Dr. Russell igate filled in as acting Dean, handling l the challenges with poise. Dr. Gary ollenbeck also stepped up as Dean of cademic Affairs.

he student body also faced many anges. This year would be the last to e any new faces in the non-traditional armD program, which started years o to meet the overwhelming demands current pharmacists who wanted to rsue a PharmD. The Class of 2005, h the help of their fellow upperclass- n in pursuit of curriculum changes, uld endure a more rigorous academic d in order to achieve a more even rse load their second year. Curricu- changes would help tailor the rses to the changing environment in pharmacy world.

Diabetes Awareness Day

Margaret Hayes, M.S.,
Director of Student Services

Tim Munn
Director of Computer and Network Services

Department of Pharmaceutical Sciences

Faculty and graduate students in the Department of Pharmaceutical Sciences conduct research that spans the pharmaceutical sciences. The research conducted by these faculty members and their graduate students include the identification of targets for new drugs, the elucidation of mechanisms of drug action, the synthesis and evaluation of potential new drug compounds, and the fabrication of novel forms for drug delivery. Approximately thirty faculty members advise and mentor seventy doctoral students. With outside funding for research estimated to be in excess of four million dollars, collaborative investigational projects opportunities have occurred with other researchers on campus and at the FDA, NIH, Johns Hopkins University, Walter Reed Army Institute of Research, and the pharmaceutical industry.

With state of the art equipment, the labs provide facilities conducive to doing research in organic synthesis, microbiology, molecular biology, drug metabolism, computational chemistry and molecular modeling. Facilities are even equipped with small-scale and pilot-scale equipment for the production of liquid, semi-solid, parenteral aerosols and solid dosage forms. With so many wonderful opportunities to interact with faculty, graduate students are offered a variety of choices in directing their futures.

The person who most influenced my life was my grandmother (mother's mother).

If I could meet anyone from the past, it would be Jesus of Nazareth.

If I could live anywhere in the world, it would be the foothills of Obudu, Nigeria (plus electricity, internet, and a credit card).

If I had to change one thing about myself, it would be my allergies.

If I could be remembered for one saying, it would be... I couldn't choose between "The goose is greater than its golden egg." and "Nothing exists for nothing else, evolution is more intelligent than Homo sapiens." So, you choose!

If I could give one piece of advice to students, I would say, "Everything on earth has an ultimate value only insofar as it positively impacts the well being of human beings. Try to turn every encounter you can (including your years here as student) into an opportunity to make a positive impact on someone's life. That someone could be your fellow students, your professors, or the cleaners who vacuum your classrooms. At the end, the measure of your life will be nothing other than the summative impact you had on the well being of other humans. Think about that!

Department of Pharmacy Practice And Science

The main mission of the Department of Pharmacy Practice and Science is to promote the health of the public through the advancement of the practice of pharmacy and through the dissemination of new knowledge related to pharmacy practice and drug use. This mission is accomplished through a variety of academic training and mentoring programs that serve to prepare professional students, graduate students, residents, fellows and pharmacists to meet the future needs of the community. Faculty and staff provide expertise, support and leadership to professional, governmental, community and health-related organizations and agencies. In doing so, opportunities to foster research into the clinical and social sciences related to pharmacy practice and drug use emerge. With a rapidly changing world, they are encouraging the development of new and innovative pharmacy practices and the role models necessary to be leading the advancement to a better quality of life for all. The Department values excellent teaching, research, and the contributions that its faculty and staff makes to the Department, School, University, State, professions and health care community.

The person who most influenced my life was my parents.

If I could meet anyone from the past, it would be Thomas Edison. His creativity, energy, and drive were unparalleled.

If I could live anywhere in the world, it would be.... We all generally have the ability to live where we choose. I choose Maryland, of course!

If I had to change one thing about myself, it would be to better manage time.

If I could give one piece of advice to students, I would say "Don't worry about grades. Remember why you are here....to learn and to think."

Cynthia Boyle, Pharm.D.
Assistant Professor
Assistant Director of Experiential Learning

Cynthia Boyle, PharmD

If I could live anywhere in the world, it would be near my children.

If I could be remembered for one saying, it would be "community pharmacy".

If I could give one piece of advice to students, I would say "Never take your profession for granted. You are benefiting from the work of all the pharmacists who preceded you in the profession and will need to be a positive influence for those who will follow. By nurturing the important aspects of your life, you will find balance personally and professionally to achieve your goals. I wish you joy, challenge, and satisfaction."

Kenneth Bauer, Pharm.D., Ph.D.
Assistant Professor

Rachel Bongiorno, Pharm.D.
Assistant Professor

Nicole Brandt, Pharm.D.
Assistant Professor
Deputy Director of the Lamy Center

Bethany DiPaula, Pharm.D.
Assistant Professor

Thomas Dowling, Pharm.D., Ph.D.
Professor

Thomas Dowling, PharmD, Ph.D.

The person who most influenced my life was my parents.

If I could meet anyone from the past, it would be General Ulysses S. Grant

If I could live anywhere in the world, it would be Cayman Island.

If I had to change one thing about myself, it would be to get more exercise (i.e use stairs in AHB).

If I could be remembered for one saying, it would be "You gotta love the kidneys, they're amazing!".

If I could give one piece of advice to students, I would say "Be persistent and keep a positive attitude."

Donald O. Fedder, PhD
Professor
BSP,University of Maryland, 1950; MPH, The Johns Hopkins University, 1978, PhD, 1982

Donald Fedder, PhD

The person who most influenced my life was my Mother.

If I could meet anyone from the past, it would be Ghandi.

If I could live anywhere in the world, it would be Baltimore.

If I could be remembered for one saying, it would be "Compliance is Deviant Behavior".

If I could give one piece of advice to students, I would say "*Keep your mind and your options open!*"

Stuart T. Haines, R.Ph., Pharm.D., BCPS, CDE
Associate Professor

Stuart T. Haines, R.Ph., Pharm.D., BCPS, CDE

The person who most influenced my life was.....Frankly, so many people have helped me to shape my life that it's not possible to select only one person – they're all important!

If I could meet anyone from the past, it would be Leonardo Da Vinci. Despite being an illegitimate child and growing up in poverty, he became an inventor, artist, scientist, musician, engineer, and student of the human body – a true Renaissance man. He was a vegetarian and loved nature. His work remains relevant and important today.

If I could live anywhere in the world, it would be Baltimore, Maryland (at the moment), but if I live long enough I'd also like to live in Victoria, British Columbia; Paris, France; and Melbourne, Australia.

If I had to change one thing about myself, it would be my voice so that I could sing karaoke at Camden Pub a lot better.

If I could be remembered for one saying, it would be *"Education is an admirable thing, but it is well to remember from time to time that nothing that is worth knowing can be taught." - Oscar Wilde*

If I could give one piece of advice to students, I would say "You don't need my advice – follow your own course, enjoy the journey, and make a contribution."

Robert A. Kerr, R.Ph., Pharm.D.
Associate Professor

Wendy Klein-Schwartz, Pharm.D.
Associate Professor
Coordinator of Research and Education

Cherokee Layson-Wolf, Pharm.D.
Assistant Professor
PharmD, University of Maryland; 2000

Cherokee Layson-Wolf, PharmD

The person who most influenced my life was...I cannot name a single person, everyone I meet has a certain influence.

If I could meet anyone from the past, it would be JD Salinger.

If I could live anywhere in the world, it would be London,England.

If I had to change one thing about myself, it would be to write more poetry.

If I could be remembered for one saying, it would be: *"Imagination is more important than knowledge"*
-Albert Einstein

If I could give one piece of advice to students, I would say: "Keep an open mind and experience different things. Learn how to see situations from other points of view."

David A. Mays, Pharm.D., BCPS
Assistant Professor
Director of Drug Information Services

Mary Lynn McPherson, Pharm.D. , BCPS,CDE
Associate Professor

Robert Michocki, RPh, Pharm.D.
Professor

David Moore, B.S., M.P.A.,
Associate Professor
Coordinator of Management Curriculum; Associate Director of Mental Health Program.

David Moore, B.S., M.P.A

The person who most influenced my life was my father.

If I could meet anyone from the past, it would be Leonardo DaVinci, a true renaissance man.

If I could live anywhere in the world, it would be The Florida Keys as manager of a cabana concession.

If I had to change one thing about myself, it would be my weight.

If I could be remembered for one saying, it would be "Squealing tires are happy tires."

If I could give one piece of advice to students, I would say "Do your homework; its the key to success."

C. Daniel Mullins, Ph. D.,
Associate Professor
BS, MIT, 1986; PhD, Duke University, 1994

Jason Noel, Pharm.D.,
Assistant Professor

Francis B. Palumbo, PhD
Professor
BSP, Medical College of South Carolina, 1968;
MS, University of Mississippi, 1973; PhD, 1974

Francoise G. Pradel, Ph.D.
Assistant Professor
BS, University of University of Paris XI, 1979; MS, University of North Carolina at Chapel Hill, 1995; PhD, University of North Carolina at Chapel Hill, 1999

Magaly Rodriguez de Bittner, RPh, PharmD, BCPS,
Associate Professor
Ambulatory Care, University of Maryland.

Magaly Rodriguuez de Bittner, RPh, PharmD, BCPS

The person who most influenced my life was my mother. What a determined and loving person.

If I could meet anyone from the past, it would be Jesus.

If I could live anywhere in the world, it would be Puerto Rico.

If I had to change one thing about myself, it would be my impulsiveness. I would love to be more methodical.

If I could be remembered for one saying, it would be "Visit other countries, explore the world, expand your universe, be open to other cultures."

If I could give one piece of advice to students, I would say, "Make patient care the center of all you do and make sure you love what you do. Be passionate about your work."

David Roffman, R.Ph., Pharm.D., BCPS,
Associate Professor
Cardiovascular Therapeutics, University of Maryland; Vice-Chair.

David Roffman, R.Ph., Pharm.D., BCPS.

The person who most influenced my life was my uncle (a CPA) who suggested that I look into Pharmacy as a career.

If I could meet anyone from the past, it would be Moses.

If I could live anywhere in the world, it would be Aspen.

If I had to change one thing about myself, it would be to take more time for myself and stop putting everyone else first.

If I could be remembered for one saying, it would be "I love you" to my family.

If I could give one piece of advice to students, I would say "remember whose life is at the other end of what you say".

Richard Rumrill, M.S.,
Assistant Professor
Director of Experiential Learning Program

Gary Smith, Pharm.D., FASHP, FCCP
Professor
PharmD, University of California, San Francisco, 1966
Chairman of Pharmacy Practice & Science

Bruce C. Stuart, Ph.D.,
Professor
Director of Peter Lamy Center
BA, Whitman College, 1965; MS Washington State University, 1968; PhD, Washington State University 1970

Mona G. Tsoukleris, R.Ph., Pharm.D.
Assistant Professor
Ambulatory Care and Adult Internal Medicine, University of Maryland.

Mona Tsoukleris, R.Ph., PharmD.

The person who most influenced my life was my grandfather, "Papaw". A man with an 8th grade education who grew up on a farm, had to move away from his family to the "big city" (Washington, D.C.) during the depression to find work, and was one of the most wise, knowledgable, and kind person I have ever met.

If I could meet anyone from the past, it would be my great, great, great, great, great-grandfather who fought in the Revolutionary War. I think it would be incredible to find out what it was like here during the formation of this great country.

If I could live anywhere in the world, it would be exactly where I live now (but with fewer things to fix).

If I had to change one thing about myself, it would be...I'd ask for a new pair of eyes. If I couldn't get that, i would ask to have more patience with others and myself.

If I could be remembered for one saying, it would be "Always do your best, but that doesn't always have to be perfect (depending on what you're doing, of course!)."

If I could give one piece of advice to students, I would say "Pick something important that you want do something about, get started doing it, do your best, always keep your goal in mind, and take some time to smell the roses while you're working your way to your goal.".

Sheila Weiss, Ph.D.
Assistant Professor
BS, University of Maine, 1981, MS, Northeastern University, 1986; PhD, The Johns Hopkins University, 1996

Julie Magno Zito, Ph.D.
Associate Professor
St.John's University, BS 1966; MS, University of Connecticut, 1972; PhD, University of Minnesota, 1984.

Thank you to all those faculty members that took the time out of their busy schedules to submit responses to our survey.

letter from the editor:

Editor-in-Chiefs for Class of 2003 (ji) and 2004 (Khoi)

Diem Thai(Editor)

I think taking on this project has been one of the most difficult things that I have done since entering pharmacy school. Around this time last year, I was just a happy/angry second year, just trying get throug all the work that was piled up in front of me. Yearbook was the last thing on my mind. Little did I know what was to come in the following year. Completing this book has brought me more joy and relief than I had ever thought possible from a project. So, needless to say, I am very happy to have completed this book Of course, I could not have done this without the help of Diem. I want to especially thank you Diem for being there for everything. Without your help and support, this book would have never seen its completion. I have truly found a great friend. Laura, Khoi, Allan, Quan, and Adrianne, thank you so muc for everything that you have done to get this book done. All of you have been a great support, and the school of pharmacy owes you guys a free yearbook for this one.

I would also like to take some time out to thank my personal friends Christina, Susan, and Shelly for supporting me throughout the year emotionally and mentally. I love you guys for it. Thank you Dr. Mackerell and Dr. Wolf for listening to my struggles regarding the yearbook. I really appreciate it! And of course, Michael, my better half, thank you for calming me down throughout the year. I would have collapsed by now if it wasn't for your wisdom and emotional support. You made this year unforgettable.I wish the best of luck to the clas of 2003! We can't wait to get there. I hope all of you look back on this yearbook and remember all the good times. In ten years, even the bad times during these four years will look good!

good luck,
Ji Hyun La Rose
